Office Action Summary	Application No. 10/706,585	Applicant(s) BOCANEGRA ET AL.	
	Examiner Chandrika Prasad	Art Unit 2839	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

2. Claims 10 and 11 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The features are already in claim 3 upon which these claims depend on.
3. Claim 1 is objected to because of the following informalities: an article is missing at the beginning of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 6 and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Keller et al. (5384880).

Keller (Figures 1-4) shows an optical fiber cable 10 having an optical fiber bundle comprising a plurality of longitudinally extending fibers ribbons 16 with a plurality of optical fibers 18 and a circular encasement 12 with an additional polymer (low density

Art Unit: 2839

polyethylene) layer 21 over the encasement. The encasement is a polymer having an elastic modulus of 1930 MPa (which is greater than 210 MPa) at normal temperature (about 23°C). Arranging fibers randomly or orderly is inherent. Each ribbon has at least three fibers. The fibers are coated with a plastic resin material 20 and are in contact with the encasement through a gel 15 in the encasement.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4, 5, 7, 8 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keller et al. (5384880).

Keller shows all the features of these claims as described above except certain sizes and properties and arrangement of the fibers in certain configuration. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide encasement of specific sizes and properties and arrange in fibers in certain order because these require mere selection and arrangement which involve only routine skill in the art.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nave (5748823) and Lochkovic et al. (5457762).
